It's a really sweet type of origami that doesn't require complex folding that no one can understand. What you need: 12 sheets of origami paper Now the first step is to make this type of origami to make the first block! 1. Start with one piece of origami paper with the color side face down and fold it in half. 2. Next, unwrap this. Then bring up the paper edge to the crease only you've done in step 1 and fold that down. 3. Turn the paper 180 degrees and repeat step 2 from the edge of the paper. 4. Turn that at 90 degrees, so you're looking at something like a closet. Open the left side door of the study and fold the bottom right corner to fold open on the left side. 5. Undo the right triangle you made in step 4 and close the left side of the closet. 6. Then turn it 180 degrees and open the new left side. Then repeat the fourth step, folding the bottom corner of the right hand until the left door folds into the closet. 7. Now instead of undoing this fold like you did before, you want to just close the left closet door with the right triangle still folded inside it. 8. Now this is probably one of the hardest steps in making this type of origami so carry with me :) Start by lifting the top right hand corner of the door as far as it will go without lifting the creases. Then take the entire top left corner and place it under the top right flap. You want to keep pushing it until it forms a triangle, just like one perpendicular to it. 9. Now take the entire shape to flip it upside down and proceed to fold the white corners down over the shape to form a parallelogram without any white showing on either side. 10. Fold 2 shape points to form a square. 11. Finally, you just want to fold the square diagonally in half, along the gap between the two points you folded in step 10. You can fold them in any direction. It wasn't hard now, was it? Now all you have to do is go do 11 more of these :D Now that you have 12 completed units, it's time to put them together. You're almost done! Note that there are dots (two triangles that hang from the square in the center) and there are pockets (4 small slots on the other side of the square). As you probably guessed, you're going to put a point in your pockets. But the important thing before you start is not to use two pockets that will cover the point of this shape if a unit has been inserted into one of them. Try to experiment to make a shape. It's a bit of a puzzle. If you are stuck try to make 4 pyramids by putting 3 units together to form a 3 one-sided pyramid-esk shape and then put them together. Experiment! The origami unit is wide open for experimentation. The shapes that you can create just knowing that the main unit is endless, the sky is the limit! Spruce/Chrissy Pk is a pretty origami fish cute decoration and a fun way to push your origami skills. This traditional model and only takes a few minutes to make. Since it's not too hard, it's great for kids to do. This traditional origami fish starts with the base of the origami windmill (which is shown). Once you master traditional fish, there are many ways to decorate them. You can create a whole school of fish in different colors. Another creative idea is to make Shikishi origami, which is a themed display. For this Shikishi, you can make a water display. Use blue paper, put the fish in the water, add a turtle, maybe a sailboat on top, perhaps a swan origami, and make a pretty scene to display in your home. This origami chart should be useful to work with to make your fish. By following the origami charts, it's helpful to look at the step you need to take next, as well as the next one to see what it should look like. Don't worry if you don't succeed in the first place. Origami is practicing. For this fish, you will need one sheet of square origami paper. Best to start with the usual origami paper 15 x 15 cm. e/Chrissy Pk 1. Fold the paper in half in both directions and unwrap. 2. Fold the left and right edges to the middle. 3. Fold the upper and lower edges to the center. 4. Turn the top and bottom flaps. 5. Pull the left and right flaps from the middle up and side. 6. Crush the bottom edge to the center. 7. Now repeat steps 5 and 6 at the top. 8. Fold the top left and bottom points, as shown in the video. Spruce / Chrissy Pk 9. Fold the corner with the green dot to the red dot. 10. Fold the flap down from the center, as shown. 11. Fold the corner with the green dot to the red dot. 12. Fold the flap down from the center, as shown. 13. Fold the top and corners to the right, as shown in the video. 14. Here's what it's supposed to look like. 15. Turn the model to the other side. Spruce / Chrissy Pk 16. Now you can tap the area of your mouth in a bit and draw the eyes. For playful fish, feel free to add to your eyelashes. If you want, you can draw your mouth as well. You can make a smiling mouth, wrinkled lips, or anything else to give your fish personality. Remember that origami can take practice. Make another one and it will be better than the first one! For more instruction as well as video instructions, check out Kawaii's YouTube paper. If you're stuck on a certain step, watching video times in action can be quite helpful. If you love the art of folding paper, then you will definitely get hooked with this site. Origami Club is a free online resource for paper lovers and origami lovers full of free and simple origami charts. With this website, you can browse through various origami creations and find directions on how to create them. Origami creations are divided into categories such as Easy Origami, Traditional, Fun Animals, Sea Creatures, Valentine, Christmas and more. Each species of origami is evaluated according to its complexity. This website will also help you create origami by following charts that can be printed on B5 and A4 paper. You can also watch animated demos to see how each origami is made. Origami Club provides you with all the knowledge you can use for your hobby of paper art. This site is also useful if you make paper toys or school projects for kids, or if you want to create useful decorations at home and organizers. Features: Provides free information about origami for free. Charts on each origami work are printed on paper B5 and A4. An animated diagram lets you see how each origami is made. View origami creations in different categories. The technique is officially Kirigami, which involves one incision during the process. Kirigami is described as a variation of origami, which involves cutting paper with scissors to achieve the result. However, if you are looking for Kirigami online, you can instead find many pop-up cards and other complex paper creations. In traditional origami there are several known models where cutting is an integral part of the manufacture of origami. If you're looking for a few more origami animals to make, check out the origami jumping frog, the traditional origami world of pigeon, and the easy origami fox. 1 square sheet of paper of any size (minimum 5 inches by 5 inches for convenience) If your paper is the same color on both sides, it doesn't matter which side you start the folds on. If your paper has a white side, start with this side up. Fold the paper in half diagonally so that you have a triangular shape, as shown in the display. Fold the bottom right corner to the middle point. Do the same on the left side. Chrissy Pk folded the top of the right flap down to the bottom. Fold the top left flap down as well. Fold about one-third of the bottom right flap to the right. Repeat on the left side. Chrissy Pk with scissors, cut the top front layer, which was not folded. Cut out the bottom point in the center. Now you should be able to move layers of flaps, as shown in the shown. Fold the top layer of the bottom flaps to match those you've already folded by following the mini step number 3 above. Fold the left and right dots inside, not all the way to the middle. You may have to use a little glue to make these flaps stay in place. Chrissy Pk folded the top points that you cut out. To form a head, fold these flaps back up, leaving a small gap. (It's called a crease.) Turn the turtle to even more form the body. fold it in half for a more three-dimensional look and add the eyes with a marker for a funny touch. If you make a turtle, fold the dots for a more rounded shell, legs and head. Chrissy P. P.
